

Waldmann Construction can help fulfill dreams

Building firm is Energy Star, Green and LEED certified

Imagine the possibilities.

Whether you're considering a new home, remodeling an existing structure or making your home more energy efficient, Waldmann Construction can help fulfill your dream.

As an award-winning design/build general contractor, it is able to create a partnership with its clients which begins with their initial design — whether it's an existing plan or just a rough idea — through the construction phase and even after the clients receive their key.

Its highly skilled staff of in-house trades includes site clearing and excavating, concrete and masonry, rough and finished carpentry, painting and staining, and drywall installation. Its carpenters are proficient with many kinds of building materials including log, timber and stick-built processes.

Since Waldmann does not work exclusively with any log dealer, it is able to offer the best product suited to its clients' budgets and needs.

Energy efficient homes

Waldmann Construction has become ENERGY STAR® certified in order to provide customers with energy-efficient homes and to show them how to save money, be more comfort-

Waldmann Construction will create a partnership with its client, assisting with the home-building process from start to finish. --Contributed Photo

able and protect the environment.

A Waldmann green-built home helps save money, protects the natural resources, and improves your family's

health, safety and comfort. The concept of "green building" is coming to be known simply as good building.

Waldmann Construction also is in

the process of building two Leadership in Energy and Environmental Design (LEED)-certified homes. LEED is a Green Building Rating System™ which is the nationally recognized rating system that ensures homes are designed and built for energy and resource efficiency as well as for the health of the residents.

LEED certification recognizes and rewards builders for voluntarily meeting high performance standards, but also gives homeowners the confidence that their home is durable, healthful and environmentally friendly.

It is Waldmann Construction's belief that a successful project is one that leaves a lasting, positive influence on everyone involved. This philosophy has led to extensive repeat business from past customers as well as word-of-mouth referrals.

Licensed in Wisconsin as well as Michigan, Waldmann Construction can handle any project. Photos of its many projects and more information can be found on its Web site at www.waldmannconstruction.com.

Waldmann Construction is located in St. Germain, between Minocqua and Eagle River, at 6221 Highway 70 East. The office telephone number is (715) 479-3132.
